

ASSURE

Data Destruction

Our Data Destruction service is designed to deliver you reliability and security, so you can meet your data protection obligations and protect your business from risk.

We can provide shredding, wiping and de-gaussing on-site in our mobile shred truck, so documented and certificated disposal can take place in front of your eyes.

Benefits

- ✓ We own a state-of-the-art shred truck capable of shredding HDDs to 20mm and 6mm, or SSDs to 2mm.
- ✓ Our truck is unbranded, and has multi-level physical security systems including CCTV
- ✓ We can perform de-gaussing, or secure data wiping using a range of industry-leading software solutions.
- ✓ We will conduct an inventory report and issue you with a Certificate of Data Destruction.
- ✓ We are certified for ISO27001 and ISO9001 by UKAS systems.

To get a quote...

Please provide the following information:

- Inventory of assets to be destroyed.
- Preferred data destruction method.
- Collection/disposal locations.
- Decommission requirements and asset locations.

Features

Data destruction can be delivered alongside other Asset Disposal services including:

- Data Centre Decommission
 - Containment removal
 - Structured cabling removal
- IT Asset Decommission
 - Removing cabling
 - De-racking Equipment
- IT Recycling
 - Server & storage
 - End-user IT
 - Office Peripherals

IT Resale (qualifying items)
Redundant equipment can provide a 50% customer rebate if it is of sufficient quality - this can be used to offset cost of collection or other services.
