

ASSURE

Workplace IT Deployment

We offer a comprehensive service for the deployment of new end-user IT equipment. Our end-to-end solution manages the equipment from purchase, managing staging and configuration, logistics to site, and desktop set up.

With precision and efficiency as priorities, we ensure users are ready with minimal latency.

Benefits

- ✓ End-to-end process enables hands-off delivery, reducing internal operational pressures.
- ✓ Single supplier reduces handovers and latency, improving deployment speed and meeting go-live dates.
- ✓ Asset tagging and staging & configuration ensures full readiness.
