The 8.7" screen of the Galaxy Tab A11 provides on-the-go interaction, while the 11" screen of the Galaxy Tab S11 and Galaxy Tab A11 delivers more space to do more. Plus, the impressive 14.6" screen of the Galaxy Tab S11 Ultra is Dynamic AMOLED 2X display with HDR 10+, producing incredible colours and deep blacks. Sleek yet mighty

Take your work anywhere, with a super-portable tablet that's big on power and performance, small on size.

The Galaxy Tab S11 Ultra is the thinnest and lightest Galaxy Tab yet, measuring in at just 5.1mm and 690g[1], while the Galaxy Tab S11 is just 5.5mm and 482g.[1]

The Galaxy Tab S10 Lite is also super sleek and slim, weighing in at just 523g[2] with a 6.6mm frame. These models' slimline nature won't compromise their durability, either. They can handle anything the office or the commute can throw at them.

The new centre of your Galaxy

Get more done with less stress by connecting and sharing simply across devices.

Galaxy Tab S and Galaxy Tab A Series devices are built to help you take your office on the go—letting you connect seamlessly across devices for super smooth working.

With Samsung DeX on the Galaxy Tab S11 and Galaxy Tab A11+ Series, you can achieve a PC-like experience on your tablet or external monitor.[1] You can expand your desktop space with Second Screen,[2] or control multiple devices with one mouse, trackpad, or keyboard—or even just your fingertips.[3] To make things even simpler, you can use Quick Share[4] across both Galaxy Tab Series to fire files across devices.

1. USB-C to HDMI adapter required—Sold separately. Samsung DeX wireless connection is available on TVs that support Android smartphone mirroring (Miracast) only. There may be a difference in performance depending on the TV's specifications and Wi-Fi environment. Galaxy Tab S10 Lite and A11+ only compatible with on-device Samsung DeX. Not available on Galaxy Tab A11 2. Second Screen requires a Galaxy Book with One UI Book 6.0 or above. For best results, make sure the two devices are close to each other and are connected to the same Wi-Fi network. 3. Multi-Control requires a Galaxy Book with One UI Book 6.0 or above, or Galaxy smartphone with One UI 5.1.1 or above. 4. Quick Share between Galaxy devices requires smartphones and tables with One UI 2.1 or above, and PCs running Windows 10 or later.

Digitally armoured

Work with total confidence knowing you're protected by sophisticated security.

The government-trusted security of Samsung Knox is part of the very fabric of Galaxy Tab Series devices.

Knox Vault hardware-based security extends the protection even further, defending sensitive data like passwords and confidential information from physical and digital attacks. It operates independently of the primary processor, meaning not even the OS can peek in.[1] And with a state-of-the-art fingerprint scanner, even if the device falls into the wrong hands, data will stay behind digital lock and key. That's security your business can rely on.

1. PINs, passwords, biometric information, digital certificates, and security keys for mobile devices are protected.

Maximised mobility

Make deploying and controlling your Galaxy Tab devices easier with simple device management.

With Knox Mobile Enrolment, part of the Knox Suite – Enterprise Plan,[1] setting up new devices is made easy. Knox integrates seamlessly with your existing mobile device management tools so you can set up in just a few steps.

You can use Knox E-FOTA to remotely control and patch firmware or use Knox Remote Support to troubleshoot issues from afar. Knox Manage unlocks access to the apps your team needs and blocks those they don't. It also allows you to wipe devices if they're lost. On top of all that, Knox Asset Intelligence helps you spot vulnerabilities and inefficiencies in your device fleet in advance.

1. Valid Samsung Knox Account required. One year of Knox Suite Enterprise Plan is included in first purchase of a 2 year or 3 year Knox Suite Enterprise Plan license key.
